

1441 COMPLIANCE GUIDE

Compliance Technologies International LLP

Training Software

CTI's 1441 Compliance Guide Software is a web-based training and implementation guide to IRC § 1441 for operations, systems, tax, and legal personnel. This guide offers "training in a box" as it gives you access to comprehensive technical material, compliance tips, useful web links, an implementation guide and workplans, a reference library and practical advice, all of which is organized by topic and areas of interest.

Thanks to a powerful search engine, it is easy to find what you're looking for and navigate through the guide. The 1441 Compliance Guide efficiently delivers expert technical knowledge to customers and company personnel who would normally be directed to tax specialists.

For more information on the 1441 Compliance Guide, or any other products in the 1441 Compliance System™, please call us at 202 783-1553 or visit us on the web at www.cticompliance.com
